

APGO Education Foundation
is now the

GEODIVERSITY EDUCATION FOUNDATION

WHAT IS GEODIVERSITY?

The natural variety of non-living, abiotic elements of the Earth, including **rocks, minerals, fossils, soils, sediments, and landforms**, along with the active physical processes that shape them.

It acts as the foundational stage upon which ecosystems and human life exist.

Our innovative website GeoscienceINFO.com is now merged with our Foundation website under one domain **geodiversity.ca**

OUR MISSION

Revolutionize public geoscience education through innovative communication strategies including real and virtual fieldtrips, social media, podcasts, and outreach events.

OUR VISION

To be recognized as the leading geoscience education foundation.

What We Do

- Promote a greater understanding of geoscience
- Produce accessible and understandable information about geoscience for the public
- Encourage young people to develop an interest in geoscience
- Help integration of internationally-trained geoscientists
- Geoscience affects people's lives almost every day but most people do not realize that – we are working to change this!

What We Bring

- Experienced team
- Partnerships with major universities & outreach organizations
- Innovative GeoHikes, GeoWalks, GeoRoutes & GeoPaddles to experience geodiversity in-person or virtually
- Engaging booths at public outreach events
- Strong online presence through geodiversity.ca, social media, podcasts and Geoblogs.
